

Annual Conference of the IEEE Industrial Electronics Society (IECON 2022)

Special Session on

“Advanced Control of Grid-Connected Converters for Distributed Generation and Power Quality”

Principal Organizer:

First name: Hadi Last name: KANAAN

Email: hadi.kanaan@usj.edu.lb

Affiliation: Saint-Joseph University of Beirut, Faculty of Engineering – ESIB, Lebanon

Co-organizer 1:

First name: Kamal Last name: AL-HADDAD

Email: kamal.al-haddad@etsmtl.ca

Affiliation: Ecole de Technologie Supérieure (ETS), Montreal, Canada

Co-organizer 2:

First name: Fadia Last name: SEBAALY

Email: fadia_sebaaly@hotmail.com

Affiliation: Ecole de Technologie Supérieure (ETS), Montreal, Canada

Call for Papers

Theme:

Renewable sources, such as photovoltaic panels, wind generators and fuel cells, are usually connected directly to the grid for cogeneration. This connection is made through power electronics interfaces that should ensure high stability, voltage regulation, power flow control, and low electromagnetic emission, along with high power density, low cost and high reliability. In some applications where high power level is required, the switching frequency of the power semiconductors is limited and the use of multilevel or interleaved converters becomes mandatory in order to get an acceptable power quality. This session addresses the issues of advanced control techniques applied to such converters to improve their performance, efficiency, reliability and cost-effectiveness.

Topics of interest include, but are not limited to:

1	Advanced control of multilevel inverters
2	Advanced control of power electronics in DC grids
3	Grid-connectivity control requirements
4	Control of paralleled or interleaved topologies
5	Modeling and model-based control of switch-mode power converters
6	Optimal control in hybrid cogeneration systems
7	Predictive control of power converters
8	Intelligent control of power converters

Good quality papers may be considered for publication in the IEEE Trans. on Industrial Electronics, subject to further rounds of review.

9	Power quality control in renewable energy systems
10	Real-time control and simulations of high power converters

Submissions Procedure:

All the instructions for paper submission are included in the conference website: <https://iecon2022.org/>

Deadlines:

Full paper submission:	April 15, 2022
Paper acceptance notification:	June 17, 2022
Camera-ready paper submission:	July. 29, 2022
